Solutions to meet your project needs

- Widths up to 39' with a traversing capacity up to 110 lbs.
- Available with one way and center opening
- Custom curves and bends
- Flexible bracket options including wall or ceiling mount
- Simple plug-in design

Motor choices

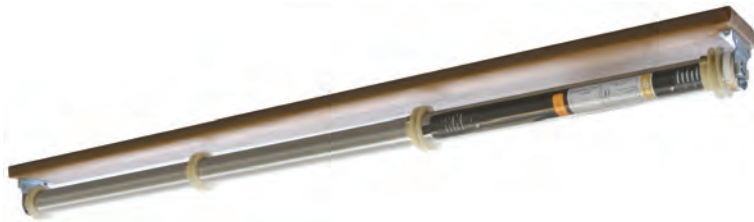

- Glystro® Range: two powerful yet quiet motor options
- Available with RTS, IR, and Dry Contact control options

Photographer: Davie Hubles Photography, Elkhart, Ind.

ABOUT THE PROGRAM

Only Somfy's unique motorized track and motorized tube program lets you focus your time on what you do best and simplifies motorizing various products including: Roman shades, Austrian shades, balloon shades, roller shades as well as Pinch Pleat, RippleFold® and Accordia® type draperies. It's never been easier to become part of the exploding high-growth market of window covering motorization and home automation.

Benefits of the program include:

- A complete range of motor solutions that provide superior performance and simplified installation. Simply choose the motor, control and associated accessories and you'll receive a fully motorized system to your specifications. All you need to do is attach the shade or drapery and install, it's that easy.
- Training opportunities about motorizing soft treatment applications that include: product features and benefits, selling techniques, specification essentials, programming and more. Once trained, you'll be a Somfy Workroom Expert and be featured on Somfy's on-line dealer locator as well as have access to program tools.
- Access to the support of Somfy's national team of Field Representatives that provide on-the-job specification, technical assistance as well as product training.
- Preferred pricing on merchandising tools including sample bags that feature motorized tubes or drapery tracks. These cases are compact, lightweight and are perfect for in-home demonstrations. What's more is that the motorized samples are designed for you to easily attach your drapery or roll-up shade creation with the provided hardware.
- A 5-year warranty on all motors and controls. 
- Minimal lead times: all orders are shipped within one week of receipt from one of Somfy's four fabrication facilities, which reduces shipping costs. Expedited delivery options are also available.

For additional program details, product training or to purchase motorized tubes and/or motorized tracks please contact us at 877-43SOMFY or visit us at www.somfysystems.com/workroom.
