Description

■ Universal motor for use in a wide range of screens

For use in

- Standard screens
- Wind resistant screens with a zip

Different adjustment options

- 2 fixed end limits
- Automatic upper end limit
- Both end limits automatic

■ Always a taut fabric with fabric stretch compensation with an automatically adjusted upper end limit

■ Protection of the zip and persons with the obstacle detection

■ Use of small aesthetic connection box for motor cables. These WT motors may be connected parallel if no individual operation is required

■ No movement of the end limits when long motor cables are used. Adjustment of the end limits is simply blocked with the switch.

■ No access to the motor head needed for adjustment of the end limits. The end limits can be adjusted through the motor cable.
